

Voltage Sags and Interruptions

Power Problems Electric Utility Can't Solve

PROBLEMS????

- ☀ Are you facing voltage drop from 10% up to 90%?
- ☀ Are you facing any interruption on production from 1 minute to almost an hour?
- ☀ Are you facing tripping of protective devices and sensitive equipments?
- ☀ Disconnection and loss of efficiency in electronic rotating machine?

CONSEQUENCES..

- Stoppage of all sensitive equipments
- Malfunction of micro-processed based control system that may lead to a process stoppage.
- Losing of information and malfunction of data processing equipments
- Tripping of contractors and electromechanical relays
- Damaging the hardware
- Costing in repairing

We have the solutions!

Covis Sdn Bhd is a Specialist in Power Quality Engineering and we are a specialist engineering group that providing expertise in all area relating to mission critical facilities design and construction.

We can assist in providing the best solutions to reduce the damages , protect from deep voltage sags and other problems during sags such as voltage imbalance, phase shifting, waveform distortion surges etc.
