

# Broad Protection for Sensitive Equipments

## Broad Protection

Equipment Breakdown coverage protects not only the equipment, machinery and systems that run your business; it also covers against a wide range of financial losses caused by equipment breakdown such as:

- Physical damage - the cost to repair or replace damaged equipment
- Perishable goods - the cost to replace spoiled or contaminated goods and materials
- Business income - expenses resulting from business interruption, such as lost income
- Expediting expenses - costs associated with limiting the loss, such as equipment rental or steps taken to speed business recovery.

## Necessary???

Is Equipment Breakdown coverage really necessary? Well, can you afford a six-digit loss, or have your operation shut down while you work on the recovery process? Consider all the events that can cause a loss: a power surge, a blackout, a faulty connection, or human error. Think about what is at risk and how the cost of an equipment breakdown can quickly escalate. Electronic equipment is fragile and costly to replace; business income is more dependent on equipment; rush repairs and rental replacement equipment can be costly

## PRODUCTS AND SOLUTIONS

### Power Conditioner- SureVolt

The SureVolt™ automatic voltage regulator provides continuous power conditioning and the broadest range of protection available. It guards against voltage fluctuations that can wreak havoc with your electrical load (equipment).

#### Features

- Fast voltage regulation corrects under/over voltage, sags, and swells
- High fault-clearing capacity permits reliable operation of other protective devices
- Built-in surge suppression for surges and spikes
- Line isolation minimizes transients
- Transformer shielding reduces line noise to deliver clean power
- Independent phase regulation corrects voltage imbalance
- Input circuit breaker protects against damaging over-current and short circuits
- Automatic failsafe electronic bypass keeps the load powered

### Voltage Conditioner- SagFighter

The SagFighter™ is an industrial-grade, solid state, electronic voltage sag corrector, or active voltage conditioner that operates without batteries or energy storage. The SagFighter is designed for frequent high-inrush current and low-power factor loads without the need to oversize the product.

#### Features

- Full sag correction within 2 milliseconds
- Sag correction duration independent of load or power factor
- Sag correction for a minimum of 100 seconds
- No need for bypass operation for high inrush or overload currents
- Continuous protection without the need to recharge or reset
- Non-continuous inverter operation that increases reliability and provides 99% efficiency

## CALL US FOR MORE INFORMATION

Covis Sdn Bhd is a Specialist in Power Quality Engineering and we are a specialist engineering group that providing expertise in all area relating to mission critical facilities design and construction.

Power Quality Specialist	Lightning Protection
Specialist	Data Center Turnkey Solution
Specialist	On-Site Critical Facilities Audit & Assessment Specialist
Specialist	Critical Facilities Builder
Specialist	Critical Equipment Maintenance & Equipment
Professional Services	Engineering
Consultancy	IT Consultancy
IT Design & Engineering
